

# **GEOLOGICAL- PALEONTOLOGICAL MUSEUM**

A look at the history  
of the earth

Universität Hamburg

DER FORSCHUNG | DER LEHRE | DER BILDUNG

CeNak  
Centrum für Naturkunde

VISION  
EVOLUTIONEUM

## **Geological-Paleontological Museum**

Fossils of dinosaurs, insects in Amber or primitive horses - the Geological-Paleontological museum invites you to a meet-and-greet with creatures from the past. You will also learn about the geology in Hamburg's surroundings and the most famous fossil deposits in Germany. The contents of the exhibition provide a basic understanding of geological processes and show what knowledge can be derived from them in terms of evolution, the development of species diversity and climate change. In addition, there are events, guided tours, lectures and a variety of educational programs - for people of all ages. Together with this museum, the Zoological Museum and the Mineralogical Museum also belong to the Centre of Natural History (CeNak).
